

BrightPath Tech

RFP Response — Procurement Evaluation Platform

Submission Date	2026-03-02
Historical Experience Rating	3.5 / 5.0
Prepared for	Procurement Evaluation Committee (synthetic classroom exercise)

Executive Summary

BrightPath Tech offers the most cost-effective and fastest path to a working procurement evaluation tool. We focus on shipping a lean, functional product quickly rather than over-engineering for scale the customer may not need yet.

Proposed Solution

Our solution is a single web application backed by a PostgreSQL database, with a simple REST API layer. We provide a CSV import/export bridge that can be used to move data in and out of common ERPs; direct native connectors are on our roadmap but not yet available in production. The application is deployed as a single container which can be scaled vertically as usage grows.

Timeline & Team

We can deliver a working version in 8 weeks: 1 week discovery, 5 weeks build, 2 weeks testing and launch. The team is two full-stack engineers and a part-time project coordinator. Given the compressed timeline, formal change-management and risk-register processes are lightweight; issues are tracked in a shared spreadsheet.

Pricing & Assumptions

Total Cost of Ownership over 3 years: \$310,000, comprising \$60,000 implementation and \$83,333 per year subscription. This is the lowest-priced option in the market for this scope. Pricing assumes up to 100 named users and does not include custom ERP connector development, which would be scoped separately.

Security & Compliance

Data is encrypted in transit via TLS. We are in the process of pursuing SOC 2 Type I certification, targeted for completion next year; it has not yet been achieved. We do not currently offer field-level encryption at rest beyond standard cloud-provider disk encryption. Access control is managed via basic username/password login; SSO support is planned but not yet available.

Support & References

Support is available on business days, 9am-6pm, via email ticketing, with a target response time of 1 business day. BrightPath Tech was founded 3 years ago and has completed 4 client engagements to date, primarily for small and mid-sized businesses. One reference is available from a regional retail client.

This document is a synthetic, fictional proposal generated for a classroom exercise. It does not represent a real company, offer, or price.
