

NexaWorks

RFP Response — Procurement Evaluation Platform

Submission Date	2026-03-01
Historical Experience Rating	4.5 / 5.0
Prepared for	Procurement Evaluation Committee (synthetic classroom exercise)

Executive Summary

NexaWorks proposes a balanced, low-risk implementation that pairs solid technical architecture with the strongest delivery methodology in this evaluation. Our focus is on predictable delivery, thorough staffing, and a support model built for long-term partnership.

Proposed Solution

Our platform uses a modular monolith architecture with clearly separated service boundaries, which we believe offers the right balance of maintainability and scalability for this use case. We offer native integrations with two major ERPs and a well-documented webhook framework for others. The system scales horizontally behind a load balancer and has been proven at deployments of up to 15,000 users.

Timeline & Team

Our delivery plan spans 16 weeks across five clearly staffed milestones: Discovery (2 weeks), Design Sign-off (2 weeks), Build Sprint 1-3 (8 weeks), UAT (2 weeks), and Go-Live (2 weeks). The team includes a delivery lead, solutions architect, 3 engineers, a QA engineer, and a change-management specialist. A detailed RAID log and weekly steering committee cadence is included as standard, with named risk owners for every identified delivery risk.

Pricing & Assumptions

Total Cost of Ownership over 3 years: \$780,000, comprising \$210,000 implementation and \$190,000 per year. Pricing assumes up to 300 named users and includes two ERP connectors and quarterly platform reviews. Assumptions are clearly itemized in the attached pricing appendix, including a defined change-request rate card.

Security & Compliance

NexaWorks holds ISO 27001 certification and is midway through SOC 2 Type II audit, with completion expected in two quarters. Data is encrypted at rest and in transit. SSO via SAML 2.0 is supported, along with role-based access control and audit logging retained for 3 years. A data processing agreement covering GDPR is available.

Support & References

NexaWorks provides a dedicated support pod with a documented escalation path and a 2-hour response SLA for critical issues, considered by our customers to be one of our strongest differentiators. We have delivered 9 similar procurement and vendor-management implementations over the past 4 years, with 3 customer references available covering healthcare, manufacturing, and public-sector clients.
